

BENEFITS OF FINANCING

COMMERCIAL EQUIPMENT & TECHNOLOGY FINANCING

YOUR FINANCING EXPERTS

As one of the Nation's Leading Experts, Dimension Funding provides the leasing and financing solutions you need, so you can focus on your real priority: Your Business' Operation. Dimension Funding has created innovative and flexible financing products that make it easy for your business to acquire, manage and control assets.

PREDICTABLE, LOW MONTHLY PAYMENTS

Financing enables you to pay over time, rather than invest a lump sum up front. Payments can be tailored for budget requirements or revenue streams that align with project ROI.

LOWER UPFRONT COSTS AND TOTAL PROJECT FINANCING

Financing reduces upfront costs, enabling you to obtain the equipment you need now without impacting cash flow. It preserves working capital and conserves existing credit lines, freeing up cash for other important operational and investment opportunities. All costs can be included to provide one payment convenience.

FLEXIBLE AND DIVERSE PAY STRUCTURES

Dimension provides varied financing arrangements that range from 12-60 months. Further, we offer cost effective Working Capital Financing.

Commercial Finance Application

For most established businesses on deals up to \$500k, Dimension offers our unique "Credit Pre-Screen" provided without any cost or obligation and which requires only the following very minimal customer/client information.
